Conference Overview

This year's Fall Conference will focus on the national move towards a Patient Centered Medical Home. Our goal is to provide you with the resources to initiate and optimize your PCMH transformation. To make the conference even more beneficial, we are bringing together experts nationwide to share their experiences and run workshops using information you bring from your practice and the steps it has or plans to take for review and constructive feedback.

The last two days of the conference will be our Fall Legislative Summit. September 13th will focus on presentation and discussion to determine this year's legislative priorities, with an opportunity to hear from the leadership of DHSS, State and Federal legislators and other state officials as part of the program. The culmination of the day will be a legislative and candidate reception, where members will have direct access to legislators and candidates. September 14th will offer a nationally-acclaimed Grassroots Advocacy Training brought to you by the National Association of Community Health Centers.

We look forward to seeing you there!

Presented by:
