about the foundation

in 2014:

our total funding

$31.8 million

481 grants

we want all Californians to be healthy and safe
our priorities and long-term goals

**2024 (10-year) Targets**

1: 100% access to care in CA

2: % increase in CA’s vulnerable populations with access to an engaged network effectively addressing DV

3: % increase in safety net patients receiving value-based care

4: improved patient engagement / survivor experience

**2015 priorities**

- Promoting value-based care in the healthcare safety net
- Enhancing care integration for health care and domestic violence (DV)
- Increasing patient engagement / improving survivor experience
- Building DV systems of care
- Developing options to promote access to care for the remaining uninsured

Emerging Opportunities Portfolio
how do we take collaboration in the health system to the next level?

U.S. Health Delivery System Transformation

1.0 Sick Care System
   - Era: 1900s-1950s
   - Healthcare Goal: Improve life expectancy

2.0 Coordinated Health Care System
   - Era: 1950s-present
   - Healthcare Goal: Reduce disability

3.0 Community Integrated Health System
   - Era: 2000 onward
   - Healthcare Goal: Optimize health

Neal Halfon, Peter Long, Debbie I. Chang, James Hester, Moira Inkelas and Anthony Rogers. “Applying a 3.0 Transformation Framework to Guide Large-Scale Health System Reform. Health Affairs, 33, no.11 (2014). Adapted from a Center for Medicare and Medicaid Innovation Figure.
### Health Transformation Framework

<table>
<thead>
<tr>
<th>System Design</th>
<th>Care Model</th>
<th>Dominant Payment Approach</th>
<th>Approach to Quality</th>
<th>Beneficiary Lens</th>
</tr>
</thead>
<tbody>
<tr>
<td>Health service providers, operating separately</td>
<td>Little coordination between in/out patient care, episodic treatment</td>
<td>Fee-for-service</td>
<td>Variable, low transparency</td>
<td>Individual</td>
</tr>
<tr>
<td>Team-based care within health</td>
<td>Chronic condition management, patient-centered care coordination</td>
<td>Value-based health payments</td>
<td>Consistent, standardize processes and outcomes</td>
<td>Patient and family</td>
</tr>
<tr>
<td>Community integrated services, health care as one component</td>
<td>Health, psychosocial, and wellness care integrated across the life course</td>
<td>Population-based global budgets, linked to multi-sector financial impact</td>
<td>Continuous learning and quality improvement</td>
<td>Subpopulations and communities, equity-oriented</td>
</tr>
</tbody>
</table>

Halfon et al., 2014. Adapted from Figure 2.
California has an “Incomplete”

- Accountable Care Organizations
- Team-based Care
- Self-care management tools, i.e. patient portals
- Care integration, i.e. behavioral or specialist
- Prevention & wellness initiatives
- Equity & Social Determinants of Health
3.0 principles & design strategies

- **Community** Empowerment and Engagement
- **Community** Integration Functions
- **Information** and Measurement
- **Financing** Approaches

Halfon et al., 2014
our work: specialty care integration via eConsult

Facilitating Collaboration

The Foundation supports innovative partnerships and solutions that help providers collaborate across systems and with patients. Thanks to Foundation grants:

over 2,700 safety net providers in Los Angeles County are using eConsult systems to coordinate patient care with

more than 275 healthcare specialists, improving access and quality of care for thousands of Californians.
our work: improving patient engagement

**Engaging Patients in Their Care**

The Foundation helps safety net providers adopt new approaches and technologies to connect with patients and build stronger relationships.

70% of low-income Californians are interested in communicating with their provider via text.

However, only 18% are able to do so.
