# Take Aways

- ▶ Health status is heavily influenced by lifestyle choices and environment
- ▶ Adverse Childhood Events are correlated to family/environment issues
  - ▶ Addressing Adverse Childhood Events and their consequence requires sustained, long-term investment
- ▶ The combination of margin trends, declining uncompensated care and hospitals' commitments to maintain community benefit call for proactive action by healthcare and policy leaders
  - ▶ Healthcare providers - hospitals, physicians, CCOs, Pharma and insurance providers - and policy makers **MUST** expand the focus of community benefit beyond charity care
  - ▶ Parties should work to find common ground on “maintenance of effort”
  - ▶ Social determinants of health are at the nexus of this opportunity
- ▶ Community benefit effectiveness requires a multi-faceted approach: Early childhood intervention, addressing homelessness, improving mental health treatment and substance abuse prevention
